DETAILED ACTION

Information Disclosure Statement

1. Applicant's prior art citation filed October 20, 2003 has been received, considered and placed of record.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Tardoni (U.S. Patent No. 6,045,056).

As per claim 1, Tardoni teaches a liquid and pressurized air supplied to a spray applicator (abstract) comprising a liquid supply line coupled with a spray nozzle (18) having a flow meter (22) disposed for sensing and/or measuring the flow rate of liquid supplied to the spray nozzle; a compressed air supply line (2) having an air regulation section (6) disposed to provide an amount of compressed air supplied to the spray nozzle; and a controller (16) connected to a transmitter housing a laser, a receiver and a computer to provide an output signal to indicate the performance characteristics of the spray nozzle based on the measured liquid pressure and/or measured air pressure (col. 7, line 55-col. 8, line 40).

Allowable Subject Matter

3. Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 7-8 are allowed.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lee et al. and Roe et al. are cited of general interest.
